

EXP NO: 1

AZURE DEVOPS ENVIRONMENT SETUP

Aim:

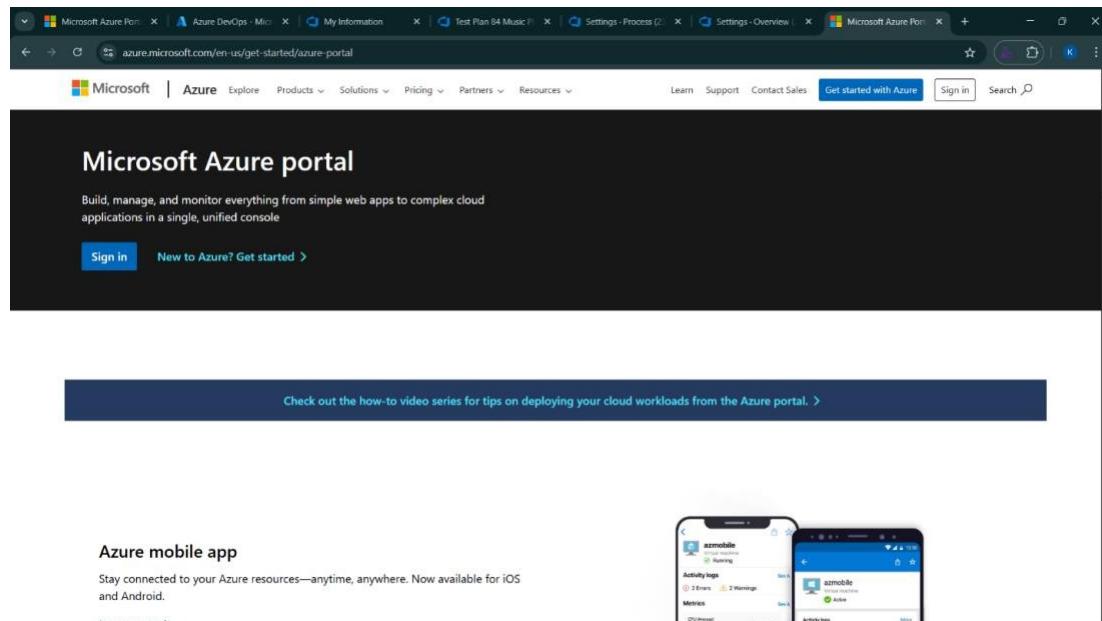

To set up and access the Azure DevOps environment by creating an organization through the Azure portal.

INSTALLATION

1. Open your web browser and go to the Azure website: <https://azure.microsoft.com/en-us/get-started/azure-portal>.

Sign in using your Microsoft account credentials.

If you don't have a Microsoft account, you can create one here: <https://signup.live.com/?lic=1>

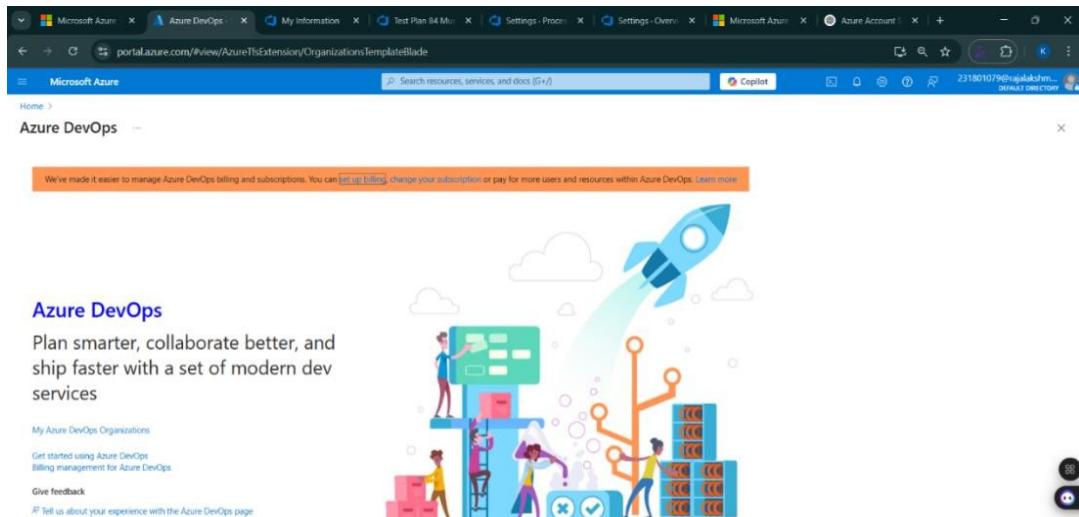

2. Azure home page

The screenshot shows the Microsoft Azure home page. At the top, there's a search bar and a Copilot button. Below the header, there's a section for 'Azure services' with icons for creating a resource, Azure DevOps organizations, Subscriptions, Dashboard hub, Resource groups, Azure Load Testing, Quickstart Center, Azure AI services, Kubernetes services, and More services. A 'Recent' tab under 'Resources' shows two items: 'Music' (Azure Load Testing) and 'Music_playlist_Batch_Creator' (Resource group), both last viewed 3 days ago. There's also a 'See all' link. The 'Navigate' section includes links for Subscriptions, Resource groups, All resources, and Dashboard. The 'Tools' section features Microsoft Learn, Azure Monitor, Microsoft Defender for Cloud, and Cost Management. The 'Useful links' section includes Azure mobile app and other Azure services like Static Web App, Rocky Linux 9, and Build Agents for Azure DevOps.

3. Open DevOps environment in the Azure platform by typing **Azure DevOps Organizations** in the search bar.

This screenshot is similar to the previous one but with a search bar at the top containing the text 'DevOps'. The search results below show various Azure services related to DevOps, such as Azure Native New Relic Service, Managed DevOps Pools, Azure DevOps organizations, Azure Native Dynatrace Service, Static Web App, Rocky Linux 9, Build Agents for Azure DevOps, InfluxDB Cloud (Official Version), DevOps architecture design - Azure Architecture Center, Secure your Azure DevOps - Azure DevOps, Course A2-400T00-A: Designing and Implementing Microsoft DevOps solutions - T..., Managed DevOps Pools Overview - Managed DevOps Pools, Microsoft Entra ID, Azure DevOps, and Continue searching in Microsoft Entra ID. The rest of the page layout is identical to the first screenshot.

4. Click on the ***My Azure DevOps Organization*** link and create an organization and you should be taken to the Azure DevOps Organization Home page.

Result:

Successfully accessed the Azure DevOps environment and created a new organization through the Azure portal.

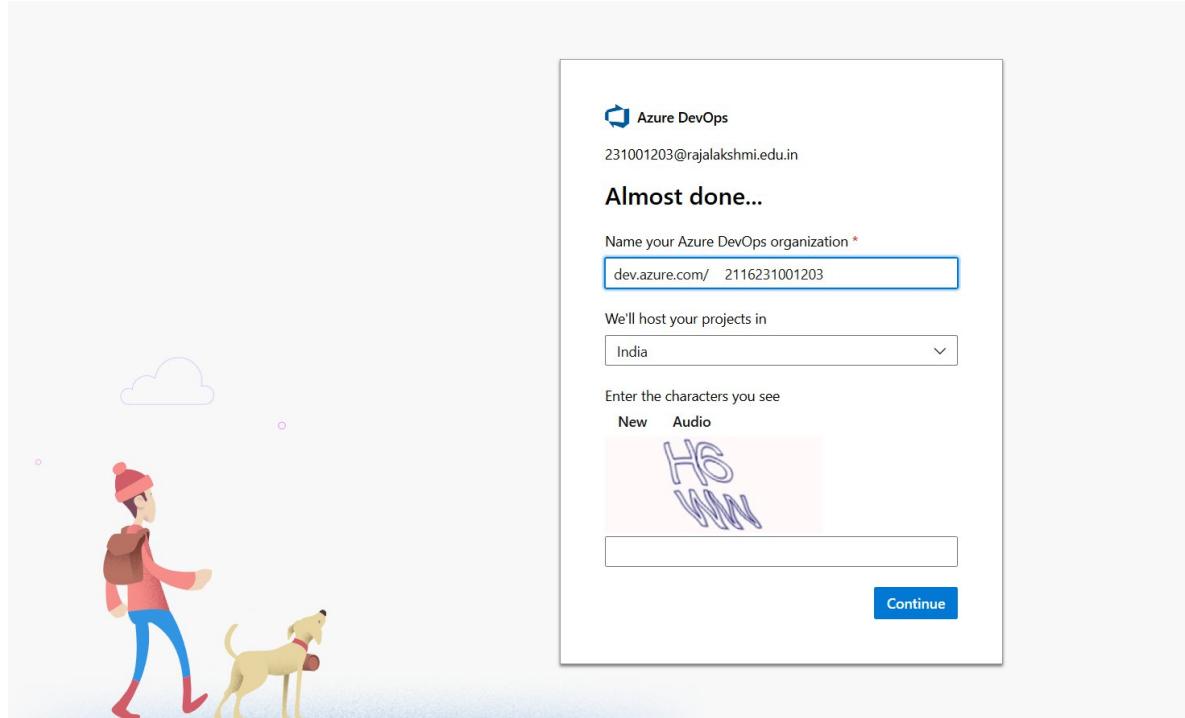

EXP NO: 2

AZURE DEVOPS PROJECT SETUP AND USER STORY MANAGEMENT

Aim:

To set up an Azure DevOps project for efficient collaboration and agile work management.

1. Create An Azure Account

2. Create the First Project in Your Organization

a. After the organization is set up, you'll need to create your first **project**. This is where you'll begin to manage code, pipelines, work items, and more.

b. On the organization's **Home page**, click on the **New Project** button.

c. Enter the project name, description, and visibility options:

Name: Choose a name for the project (e.g., **LMS**).

Description: Optionally, add a description to provide more context about the project.

Visibility: Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).

d. Once you've filled out the details, click **Create** to set up your first project.

Create new project

Create

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

The screenshot shows the Azure DevOps Organization Home page. At the top, there's a blue header bar with the Microsoft logo on the left and user information on the right (Sitheswar K, Sign out). Below the header, on the left, is a large circular profile picture with the letters 'SK' in white. To its right, the user's name 'Sitheswar K' and email '231001203@rajalakshmi.edu.in' are displayed, along with an 'Edit profile' button. Further down, location information ('India') and contact details ('231001203@rajalakshmi.edu.in') are shown. A horizontal line separates this from the main content area. The main content area has a light gray background and features the title 'Azure DevOps Organizations' at the top center. To the right of the title is a blue 'Create new organization' button. Below the title, there's a section for 'Projects' showing one item: 'Batch Data Analysis and Visualization' with a small green folder icon. To the right of the project is an 'Actions' section with a blue 'Open in Visual Studio' button. At the bottom of the main content area, there's a link 'New project'. On the far left of the main content area, there's a sidebar for 'Visual Studio Dev Essentials' with the text 'Get everything you need to build and deploy your app on any platform.' and a 'Use your benefits' button.

4. Project dashboard

The screenshot shows the Azure DevOps Project dashboard for the 'Batch Data Analysis and Visualization' project. The dashboard is organized into several sections:

- Left Sidebar:** A vertical sidebar with icons for Overview, Summary, Dashboards, Wiki, Boards, Repos, Pipelines, Test Plans, and Artifacts.
- Header:** Displays 'Azure DevOps 231001203 / Batch Data Analysis and Vis... / Overview / Summary' and a search bar.
- Project Title:** 'Batch Data Analysis and Visualization' with a 'Private' button and an 'Invite' button.
- About this project:** A section describing the project's purpose, features, and key functionalities like Data Upload, Cleaning, and Processing.
- Project stats:** A summary of work item counts over the last 7 days.
- Boards:** A section showing 0 Work items.
- Members:** A section showing 5 members.

5. To manage user stories:

a. From the **left-hand navigation menu**, click on **Boards**. This will take you to the main **Boards** page, where you can manage work items, backlogs, and sprints.

b. On the **work items** page, you'll see the option to **Add a work item** at the top. Alternatively, you can find a + button or **Add New Work Item** depending on the view you're in. From the **Add a work item** dropdown, select **User Story**. This will open a form to enter details for the new User Story.

Order	ID	Title	Assigned To	State	Tags
1	13	Column Operations		To Do	
	14	Change Data Types of Columns		To Do	
	15	Apply Bulk Transformations		To Do

[My Microsoft account](#) [Switch directory](#) ...

Result:

Successfully created an Azure DevOps project with user story management and agile workflow setup.

EXP NO: 3

SETTING UP EPICS, FEATURES, AND USER STORIES FOR PROJECT PLANNING

Aim:

To learn about how to create epics, user story, features, backlogs for your assigned project.

Create Epic, Features, User Stories, Task

The screenshot shows the Azure DevOps Boards backlog view for the 'Batch Data Analysis and Visualization Team'. The left sidebar includes links for Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, Artifacts, and Project settings. The main area displays a backlog of tasks with columns for Order, ID, Title, Assigned To, State, and Tags. Tasks include 'Column Operations', 'Change Data Types of Columns', 'Apply Bulk Transformations', 'Cleaning Engine', 'Remove Duplicate Records', 'Handle Large File Uploads', 'Manage Uploaded Files', and 'Upload via Drag-and-Drop'. A 'Planning' sidebar on the right shows a timeline from 5/1/2025 to 5/7/2025, indicating work items scheduled for Sprint 1.

1. Fill in Epics

The screenshot shows the Azure DevOps Work Items screen for creating a new epic. The left sidebar is identical to the previous screenshot. The main area is titled 'NEW EPIC' and contains fields for 'Manage uploaded file', 'State' (set to 'To Do'), 'Area' (Batch Data Analysis and Visualization), 'Reason' (Added to backlog), 'Iteration' (Batch Data Analysis and Visualization\development team), and a 'Save' button. Below these are sections for 'Description' (with placeholder 'Click to add Description.') and 'Discussion' (with a comment input field). A 'Planning' section on the right includes fields for Priority (set to 2), Start Date (Select a date...), and Target Date (Select a date...).

2. Fill in Features

Azure DevOps 231001203 / Batch Data Analysis and Vis... / Boards / Work items

Work Items | Back to Work Items

NEW EPIC *

EXP NO: 5

POKER ESTIMATION

Aim:

Create Poker Estimation for the user stories - Music Playlist Batch Creator Project.

Poker Estimation

The screenshot shows the Azure DevOps interface for creating a new work item. The left sidebar is titled 'Batch Data Analysis an...' and includes options like Overview, Boards, Work items, Repos, Pipelines, Test Plans, Artifacts, and Project settings. The 'Work items' option is selected. The main area is titled 'Work Items' and has a sub-section 'NEW EPIC *'. It shows a card for 'User Access and Security' with the state 'To Do', reason 'Added to backlog', area 'Batch Data Analysis and Visualization', and iteration 'Batch Data Analysis and Visualization\development team'. The card also includes sections for 'Description' (with placeholder 'Click to add Description.'), 'Planning' (Priority 2, Start Date, Target Date), and 'Related Work' (with a link to 'Add an existing work item as a parent'). A comment section at the bottom allows users to add comments using Markdown syntax. A red circular badge with 'sk' is visible in the top right corner of the comment area.

Result:

The Estimation/Story Points is created for the project using Poker Estimation.

TESTING – TEST PLANS AND TEST CASES

Aim:

Test Plans and Test Case and write two test cases for at least five user stories showcasing the happy path and error scenarios in azure DevOps platform.

Test Planning and Test Case

1.New test plan

The screenshot shows the Azure DevOps interface for creating a new test plan. The left sidebar is titled 'Batch Data Analysis an...' and includes options like Overview, Boards, Repos, Pipelines, Test Plans (which is selected), Test plans, Progress report, Parameters, Configurations, Runs, Artifacts, and Project settings. The main area is titled 'New Test Plan' and contains three input fields: 'Name *' with the value 'Batch Data Analysis and Visualization - Test Plan', 'Area Path *' with the value 'Batch Data Analysis and Visualization', and 'Iteration *' with the value 'Batch Data Analysis and Visualization\development team'. Below these fields are two buttons: 'Create' (in blue) and 'Cancel' (in grey). The top navigation bar shows 'Azure DevOps 231001203 / Batch Data Analysis and Vis... / Test Plans' and includes a search bar and various icons.

2. Test suite

The screenshot shows the Azure DevOps Test Plans interface. On the left, there's a sidebar with various project management options like Overview, Boards, Repos, Pipelines, Test Plans, and Artifacts. The 'Test Plans' section is currently selected. In the main area, a 'Batch Data Analysis and Visualization - Test Plan (ID: 25)' is displayed. A context menu is open over the 'Test Suites' section, listing options such as 'New Suite', 'Assign configurations', 'Export', 'Assign testers to run all tests', and 'Import test suites'. Below this, the 'Test Cases (3 items)' section is visible, showing three entries: 'Static suite', 'Requirement based suite', and 'Query based suite'. The 'Requirement based suite' entry has a small 'is with progress indicator' icon next to it.

USER STORIES

- **US01 (ID: 201): As a user, I want to upload data files (CSV, JSON, etc.) for analysis.**
- **US02 (ID: 202): As a user, I want to view the uploaded data in tabular format.**
- **US03 (ID: 203): As a user, I want to visualize insights (charts, graphs) using various parameters.**
- **US04 (ID: 204): As an admin, I want to manage users and access controls.**
- **US05 (ID: 205): As a user, I want to download the analyzed data or charts**

Test Suite: TS01 - Data Upload & Parsing (ID: 301)

TC01 – Successful CSV Upload

- **Action:**
 - Log in.
 - Go to upload section.
 - Select a valid CSV file and upload.
- **Expected:**
 - File uploads successfully, and data preview is shown.
- **Type: Happy Path**

TC02 – Upload with Unsupported Format

- **Action:**
 - Try uploading an XML file.
- **Expected:**
 - Error: "Unsupported file format."
- **Type: Error Path**

Test Suite: TS02 - Data Viewing (ID: 302)

TC03 – Display Uploaded Data

- **Action:**
 - Upload a valid CSV file.
 - Click “View Data”.
- **Expected:**
 - Table displays with correct rows and columns.
- **Type:** Happy Path

TC04 – View Without Upload

- **Action:**
 - Directly click “View Data” without any upload.
- **Expected:**
 - Error: "No data available. Please upload a file."
- **Type:** Error Path

Test Suite: TS03 - Visualization (ID: 303)

TC05 – Generate Chart from Data

- **Action:**
 - Upload data.
 - Select chart type (e.g., bar).
 - Select fields and click "Generate".
- **Expected:**
 - Chart displays based on selected fields.
- **Type:** Happy Path

TC06 – Chart Generation with Missing Input

- **Action:**
 - Upload data but don't select any field.
 - Click “Generate Chart”.
- **Expected:**
 - Error: "Select at least one field to visualize."
- **Type:** Error Path

Test Suite: TS04 - Admin User Management (ID: 304)

TC07 – Admin Access Dashboard

- **Action:**
 - Login as admin.
 - Go to "User Management".
- **Expected:**
 - List of registered users appears.
- **Type:** Happy Path

TC08 – Non-Admin Tries Admin Access

- **Action:**
 - Login as a normal user.
 - Attempt to access admin panel via URL.
- **Expected:**
 - Error: "Access Denied."
- **Type:** Error Path

Test Suite: TS05 - Data Download (ID: 305)

TC09 – Download Data as CSV

- Action:
 - After analysis, click “Download CSV”.
- Expected:
 - File downloads successfully.
- Type: Happy Path

TC10 – Download Without Analysis

- Action:
 - Click “Download CSV” before uploading any data.
- Expected:
 - Error: "No data available to download."
- Type: Error Path

Test Cases

Azure DevOps Test Case creation interface for 'Batch Data Analysis and Vis...' project. The title bar shows 'Azure DevOps 231001203 / Batch Data Analysis and Vis... / Test Plans / Batch Data Analysis and Vis...'. The main area is titled 'NEW TEST CASE *' with the name 'export file failure' entered. The 'Steps' section is empty, showing a placeholder 'Click or type here to add a step'. Other sections include 'Deployment', 'Development', and 'Related Work'.

Visualization Dashboard

Azure DevOps Test Case details interface for 'TEST CASE 28' in the 'Visualization Dashboard' project. 4. Running the test cases

The screenshot shows the Azure DevOps Test Plans interface. On the left, the navigation bar includes 'Overview', 'Boards', 'Repos', 'Pipelines', 'Test Plans' (selected), 'Test plans', 'Progress report', 'Parameters', 'Configurations', 'Runs', and 'Artifacts'. Under 'Test Plans', 'Batch Data Analysis and Vis...' is selected. The main area displays the 'Batch Data Analysis and Visualization - Test Plan (ID: 25)' with a timeline from 'May 1 - May 7' and a status of 'Past'. The 'Execute' tab is active. A table titled 'Test Points (4 items)' lists four entries:

Title	Outcome	Order	Test Case Id
<input checked="" type="checkbox"/> successful upload	Active	1	26
<input type="checkbox"/> handle large file uploads with progress indicator	View execution history	2	27
<input type="checkbox"/> Visualization Dashboard	Mark Outcome	3	28
<input type="checkbox"/> export file failure	Run	Run for web application	29

A context menu is open over the first row, showing options: 'Edit test case', 'Assign tester', 'Run for desktop application', and 'Run with options'. The 'Run for web application' option is highlighted.

The screenshot shows a Microsoft Edge browser window titled 'Runner - Test Plans - Personal 4 - Microsoft Edge'. The address bar shows the URL: https://dev.azure.com/231001203/Batch%20Data%20Analysis%20and%20Visualization/_testExecution/Index. The page content displays the results of a test execution:

10. Changing the test template

The screenshot shows the Azure DevOps Settings interface, specifically the Process section. On the left, there's a sidebar with sections for General (Overview, Projects, Users, Billing, Global notifications, Usage, Extensions, Microsoft Entra), Security (Security overview, Policies, Permissions), Boards (Process), and Pipelines. The main area is titled "All processes" and lists four templates: "Basic (default)", "Agile", "Scrum", and "CMMI". Each template has a description and a "Team projects" count.

11. View the new test case template

The screenshot shows the 'Add a field to Bug' dialog in the Azure DevOps interface. The 'Definition' tab is selected. Under 'Use an existing field', the 'Acceptance Criteria' field is chosen. Under 'Create a field', a new field named 'type' is being created, defined as 'Text (single line)'. A description is optional. At the bottom are 'Add field' and 'Cancel' buttons.

The screenshot shows the 'System processes' page in the Azure DevOps interface. It displays a table with one row: '231001203 agile'. The columns are 'Name' and 'Description'. The 'Projects' tab is selected at the top. A message at the top states: 'System processes cannot be customized. To add customization create an inherited process.'

The screenshot shows the Azure DevOps interface for creating a new test case. The left sidebar is titled "Organization Settings" and includes sections for General, Security, and Boards. The "Process" board is currently selected. The main area shows the navigation path: All processes > 231001203 alige > Test Case. Below this, there are tabs for Layout, States, and Rules, with Layout being the active tab. A toolbar at the top of the main content area includes buttons for New field, New group, New page, Get extensions, and a search bar. The main content area is divided into several sections: "Steps" (selected), "Recent test results", "Deployment", "Development", "Related Work", and "Status". The "Steps" section contains a placeholder text "Text (multiple lines)". The "Recent test results" section shows "Recent test case results". The "Deployment" section shows "Deployments". The "Development" section shows "Links". The "Related Work" section shows "Links". The "Status" section shows fields for "Priority" (type Integer) and "Automation status". A vertical scroll bar is visible on the right side of the main content area.

Result:

The test plans and test cases for the user stories is created in Azure DevOps with Happy Path and Error Path

EXP NO: 9	LOAD TESTING AND PERFORMANCE TESTING
-----------	---

Aim:

To create an Azure Load Testing resource and run a load test to evaluate the performance of a target endpoint.

Load Testing**Steps to Create an Azure Load Testing Resource:**

Before you run your first test, you need to create the Azure Load Testing resource:

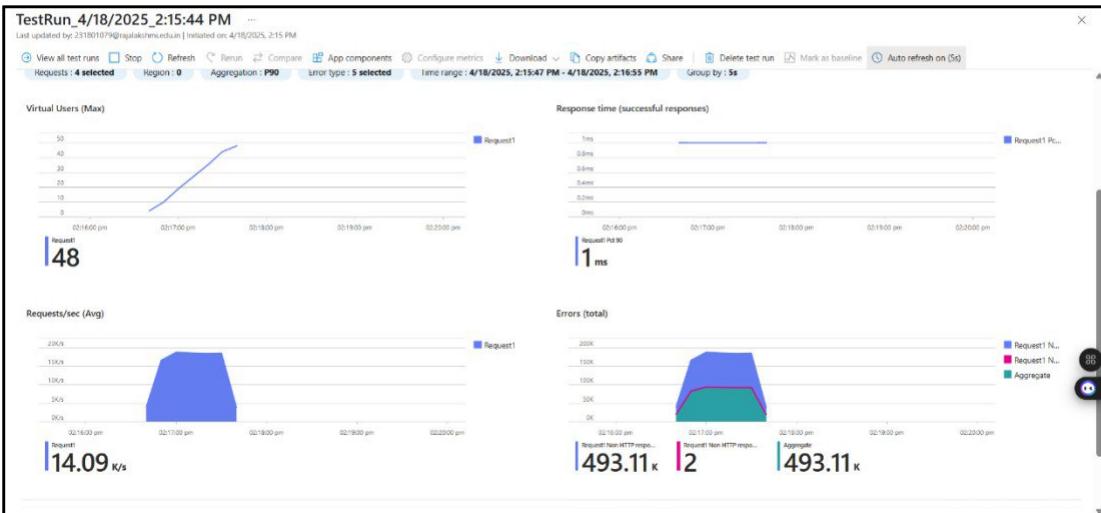

1. Sign in to Azure Portal
Go to <https://portal.azure.com> and log in.
2. Create the Resource
 - o Go to *Create a resource* → Search for “Azure Load Testing”.
 - o Select Azure Load Testing and click Create.
3. Fill in the Configuration Details
 - o *Subscription*: Choose your Azure subscription.
 - o *Resource Group*: Create new or select an existing one.
 - o *Name*: Provide a unique name (no special characters).
 - o *Location*: Choose the region for hosting the resource.
4. (Optional) Configure tags for categorization and billing.
5. Click Review + Create, then Create.
6. Once deployment is complete, click Go to resource.

Steps to Create and Run a Load Test:

Once your resource is ready:

1. Go to your Azure Load Testing resource and click Add HTTP requests > Create.
2. Basics Tab
 - o *Test Name*: Provide a unique name.
 - o *Description*: (Optional) Add test purpose.
 - o *Run After Creation*: Keep checked.
3. Load Settings
 - o *Test URL*: Enter the target endpoint (e.g., <https://yourapi.com/products>).
4. Click Review + Create → Create to start the test.

Load Testing

2116231001233

CS23432

Result:

Successfully created the Azure Load Testing resource and executed a load test to assess the performance of the specified endpoint.

EXP NO: 10

GITHUB: PROJECT STRUCTURE & NAMING CONVENTIONS

Aim:

To provide a clear and organized view of the project's folder structure and file naming conventions, helping contributors and users easily understand, navigate, and extend the Music Playlist Batch Creator project.

GitHub Project Structure

The screenshot shows a GitHub repository page for 'batch-data-analysis-and-visualisation' owned by 'recsithes'. The repository has 1 branch and 0 tags. The main file listed is 'README.md'. The commit history shows several uploads of files including 'output images', 'IPL_Squad_2023_Auction_Dataset.csv', 'README.md', 'app.py', 'class diagram.pdf', 'er diagram.pdf', and 'sequence diagram.pdf'. The last commit was 3 minutes ago. The repository has 0 stars, 1 watching, and 0 forks. It also lists 'About', 'Releases', 'Packages', and 'Languages' sections.

Result:

The GitHub repository clearly displays the organized project structure and consistent naming conventions, making it easy for users and contributors to understand and navigate the codebase.
